

Bando Restrictor Plate Installation

Some Tracks Require a Restrictor Plate to Limit Engine Power

Be sure the fuel pump vacuum line is connected to the rear valve cover, rather than the intake manifold, whenever a restrictor plate is installed.

Although the original bolts may work, the 2 shorter mounting bolts (arrow) should be replaced by bolts 1/4" longer.

ONLY FOR USE AT RACETRACKS THAT MANDATE THE USE OF A RESTRICTOR PLATE)

- One gasket on top of the intake tube
- One restrictor plate on top of gasket
- One gasket on top of restrictor plate
- One plastic spacer on top of gasket
- One gasket on top of plastic spacer
- Carburetor intake on top of gasket

The above listed components must be stock as delivered by 600 Racing, Inc.

This is the stock (and only legal) configuration that these components are to be installed on a Bandolero Car.

If a car is found with these components installed in any configuration other than is listed above, the competitor will be disqualified.
